

drop arm awnings

made to measure

Melbourne Shade Systems Drop Arm Awnings are the perfect solution for upstairs windows and doorways, designed to withstand high winds and adverse weather.

They are fitted externally around a window frame and consist of a retractable blind made from canvas or mesh fabric and attached to a frame with arms that pivot half way down the window, attached to the external wall.

Highly versatile and suitable for windows that face any direction.

When the awning is partially extended, it provides protection from overhead sun (north facing windows) whilst still retaining a view to the outside. When the awning is fully extended it covers the entire window and provides protection from the sun at low angles (east or west). The lengths of the arms are approximately half the drop of the awning.

Various types of fabric from Traditional Canvas to Acrylic Canvas and Shade Mesh in many colours and patterns to choose from.

Geared operation with crank handle or motorised with Somfy motor and remote control and Sun sensor to keep your home cool even when you are not in the house.
