

# TILTED LOUVRE PERGOLA

An innovative fixed tilted louvre system that allows you to create an open, closed or semi-open ceiling via the touch of a button. With intricate control over the ceiling panel angles, you have the ultimate in ventilation, heat and light adjustment as well as protection from the elements. This includes being able to close the roof completely, making it waterproof against the rain and shielding you from bad weather. You can also control the mood of your event by being able to ventilate your pergola on a hot summer's evening.

Optional extras can be integrated with this system, including lighting. It is ideal for a number of applications and adds value to your property.

Our Tilted Louvre Pergola is the ultimate expansion of your lifestyle!
